## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(e). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 24 August 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **DETAILED ACTION**

This action is in response to an 8/24/2004 amendment, which has been placed in the file of record.

#### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 31-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tuttle (Us 6,509,829) in view of Stutz, "Your Vacation Plans for Sale?" Wired News, posted online July 9, 1998.

Re claims 31: Tuttle teaches (see for example column 16, lines 15-40) an electronic boarding pass (column 16, line 36) which conveys both a confirmation number (column 16, lines 27-28) and a frequent flyer number (column 16, line 17). The card (column 16, lines 15-40) communicates wirelessly with the reservation and tracking system.

As has been discussed in prior actions, the nature of frequent flyer programs, which Tuttle's system clearly interacts with through by conveying the frequent flyer number, is to collect travel data for each user.

Tuttle fails to teach or suggest bundling the data for sale and selling the data.

Stutz discusses a plan (entire document; notably page 1, 2<sup>nd</sup> paragraph) in which passenger data is collected for sale to direct marketers. As described, this data includes travel

Art Unit: 2876

itineraries and passenger information, which is just the sort of thing that a frequent flier tracking system could collect. Although not explicitly stated, sale of this data would naturally subsidize the transportation system, revenue comes from a source other than ticket sales.

In view of Stutz, it would have been obvious to one of ordinary skill in the art at the time the invention was made to include the old and well-known sales of travel data gathered because this can increase revenue for airlines, and benefit direct marketers who would sell to travelers.

Re claims 32-34, 36-38, 40: By definition, frequent flier programs meet these limitations.

Re claim 35: It has been known for years to mine data to achieve useful demographic profiling for marketing purposes. This has been done with the various data collected each decade by the US Census. The motive has been greater marketing success.

Re claim 39, 41: It is clear in Stutz (page 1, 2<sup>nd</sup> paragraph) that the direct marketers buying the data would do business in areas traveled by the fliers; otherwise what purpose would data on 'travel itineraries' serve?

Re claim 42: See claim 31. Also, regarding the limitation of 'managing the transportation system based on these statistical reports,' frequent flier programs can and are commonly used to fill airplanes. How is this done? Frequent fliers are given benefits on certain flights but not others.

Re claim 43-49: By definition, frequent flier programs meet these limitations.

Re claim 50: It is known frequent fliers programs have certain days they are not allowed to use their miles. This is a determination of the impact that the travelers would have of traffic

Art Unit: 2876

flow, and then using the program to modify traveler's behavior, i.e. modify transportation services based on traffic flow.

***Response to Amendment***

The applicant has argued that since a frequent flier card previously employed does not involving electronic communication in gaining access, the Instant Application should be allowed. Tuttle (US 6,509,829) as discussed above (column 16, lines 20-40 are exemplary) teaches a card having frequent flier info and performing the above, and is employed in an obvious-type rejection, as shown above.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel A Hess whose telephone number is (571) 272-2392. The examiner can normally be reached on 8:00 AM - 5:00 PM M-F.

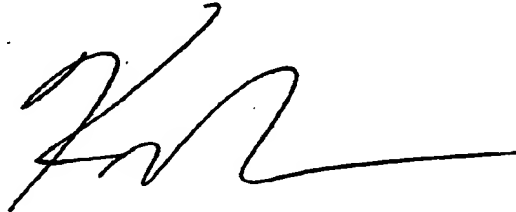

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G Lee can be reached on (571) 272-2398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
